

INTRODUCTION TO WORKPLACE HEALTH AND SAFETY RISK ASSESSMENT (Health and Safety Representative Stage 2)

Provide your reps with a set of tools to improve risk assessments in your workplace.

+ Who's at home waiting for you?

This course will give your health and safety representatives practical knowledge and skills to help them better identify hazards, assess, control, consult, and communicate about risk, as well as monitor and review risk.

This course has been designed for health and safety representatives.

Learn the role of incident reporting and investigation in improving risk assessments.

We offer this as a public course, or we can run it in-house just for your staff.

NZQA Unit Standard 30265
(Off-course assessment)
Credits: 8

After completing this course, you'll know:

- + The legal requirements for risk assessment
- + How to identify hazards
- + How to assess risk
- + How to control risks
- + About monitoring and reviewing
- + How to communicate and consult about risk assessments

“ For two years in a row, Colmar Brunton research found that satisfaction with IMPAC’s training was much higher than any other provider’s. In fact, Colmar Brunton said that IMPAC’s customer satisfaction score is one of the highest they have seen in any market. ”
